

# Trần Minh Đức

Fullstack Web Developer

## Personal Information

Phone: (+84) 988 224 390  
Email: duc.tran.dev@email.com  
LinkedIn: linkedin.com/in/tran-minh-duc  
GitHub: github.com/tran-minh-duc  
Location: Da Nang, Vietnam  
Fit score: 40/100

## Career Goals

Fullstack developer aiming to shift from PHP/Node.js systems to Java/Spring enterprise products. Interested in clean coding, testing, and business system modernization.

## Education

2013-2017 B.Sc. Computer Science, University of Science and Education, Da Nang.

## Certificates

2023 Scrum Fundamentals  
2021 TOEIC 700  
2020 Laravel Certification

## Soft Skills

Requirement clarification  
Ownership  
Production support

## Hobby

Coffee brewing, chess, tech meetups.

## Experience Summary

Fullstack developer with 6 years of experience in business web systems. Stronger in PHP, Node.js, HTML/CSS/JavaScript and SQL than Java/Spring. The candidate can contribute to UI and API work, but would need ramp-up for senior Java/Spring architecture and Japan-facing design documents.

## Selected Projects

### 1. SME ERP Web System

Company project | Fullstack Developer

A web ERP for sales order, purchase request, inventory, and accounting export.

- Built modules with Laravel, Vue.js, MySQL, and REST APIs.
- Implemented approval flows, role permissions, and report screens.
- Supported bug fixing and user acceptance testing.

### 2. Logistics Tracking Portal

Company project | Backend-focused Developer

Shipment tracking and delivery status portal for operations staff.

- Developed Node.js APIs and PostgreSQL queries.
- Integrated carrier webhook events and email notifications.
- Improved query performance with indexing and pagination.

### 3. Basic Spring Boot Training App

Internal learning project | Developer

Small training app for user management and product CRUD.

- Implemented Spring Boot controllers, services, and repositories.
- Practiced JPA, validation, and simple unit tests.
- Not yet used in a large production Java system.

# Trần Minh Đức

Fullstack Web Developer

## Profile Snapshot

6 years building business web systems, mostly with PHP and Node.js. Has useful web and SQL background but only moderate Java/Spring depth.

## Core Strengths

Business web apps  
SQL and API integration  
Basic Spring Boot  
Team collaboration

## Selected Projects and Skills

### 4. Retail Promotion Tool

Company project | Fullstack Developer

Promotion setup tool for a small retail chain.

- Built discount rule UI and CSV import features.
- Worked with business users to refine validation rules.
- No direct POS integration, but familiar with retail terms.

### 5. Customer Feedback Dashboard

Company project | Frontend Developer

Dashboard for satisfaction surveys and complaint categories.

- Created charts and filterable tables with Vue.js.
- Wrote test cases for common UI scenarios.
- Prepared user guide in Vietnamese.

### 6. Internal API Gateway Maintenance

Company project | Support Developer

Maintenance of existing gateway configuration and logs.

- Monitored API errors and fixed routing configuration.
- Collaborated with senior engineers on incident analysis.
- Documented troubleshooting steps.

## Skills

Backend Development

- PHP/Laravel, Node.js, Express, basic Java/Spring Boot, REST APIs.

Frontend Development

- HTML, CSS, JavaScript, Vue.js, Bootstrap, responsive UI.

Databases

- MySQL, PostgreSQL, SQL tuning basics, schema maintenance.

DevOps and Collaboration

- Git, Jira, Docker basics, Nginx, Linux.

Quality Engineering

- Manual testing, basic PHPUnit/Jest, API smoke tests.

## Languages

Vietnamese native; English intermediate reading/writing.
