

Claire Moreau

Java Backend Developer

Personal Information

Phone: (+33) 6 12 34 56 78
Email: claire.moreau.java@email.com
LinkedIn: linkedin.com/in/claire-moreau
GitHub: github.com/claire-moreau
Location: Lyon, France
Fit score: 55/100

Career Goals

Backend-oriented engineer seeking a fullstack enterprise role where Java/Spring architecture, API reliability, and cross-team documentation are central.

Education

2012-2017 M.Sc. Software Engineering, INSA Lyon.

Certificates

2023 AWS Certified Cloud Practitioner
2021 Oracle Java SE 11
2019 IELTS 7.5

Soft Skills

Analytical thinking
Design documentation
Remote collaboration

Hobby

Trail running, reading architecture books, volunteering at coding workshops.

Experience Summary

Java backend developer with 7 years of experience delivering enterprise APIs, batch processing, and integration services. Strong match for Java/Spring and documentation requirements, but weaker fit for fullstack UI ownership and retail/POS domain knowledge.

Selected Projects

1. Insurance Policy Service Platform

Company project | Java Backend Developer

A Spring Boot service platform for policy issuance, amendment, and renewal workflows.

- Designed REST APIs and service-layer components with Spring Boot.
- Implemented validation, transaction handling, and integration with document services.
- Wrote English technical design notes and API contracts.

2. Payment Reconciliation Batch System

Company project | Backend Developer

A nightly reconciliation system processing bank payment files and ledger records.

- Built Spring Batch jobs and PostgreSQL reconciliation queries.
- Improved error logging and retry handling for failed records.
- Added integration tests for critical processing scenarios.

3. Customer Identity API

Company project | Backend Developer

API layer for customer identity, authentication events, and audit trails.

- Implemented Spring Security, OAuth2 flows, and audit logging.
- Worked with frontend teams to clarify API behavior.
- Tuned SQL queries and optimized pagination.

Claire Moreau

Java Backend Developer

Profile Snapshot

7 years of Java backend engineering. Strong Spring Boot, REST and SQL, but limited retail/POS and only moderate frontend depth.

Core Strengths

Java/Spring backend
API design
SQL optimization
English documentation

Selected Projects and Skills

4. Operations Admin Console

Company project | Backend-focused Fullstack Developer

Admin console for support staff to search transactions and trigger corrections.

- Created limited React screens and API integration.
- Added role-based access checks and export endpoints.
- Supported QA in system testing cycles.

5. Data Migration Tool

Company project | Developer

Migration utilities for legacy customer and contract records.

- Built Java CLI tools for validation and transformation.
- Generated exception reports for business review.
- Created technical runbooks in English.

6. Monitoring and Alerting API

Company internal project | Developer

Internal API exposing service health, SLA metrics, and error summaries.

- Integrated logs and metrics from multiple services.
- Created endpoints for dashboards and incident review.
- Improved operational visibility for support engineers.

Skills

Backend Development

- Java, Spring Boot, Spring Security, Spring Batch, JPA/Hibernate, REST APIs.

Frontend Development

- Basic HTML, CSS, JavaScript, React maintenance, API integration.

Databases

- PostgreSQL, Oracle, SQL optimization, transaction handling.

DevOps and Collaboration

- Git, Jira, Docker, Jenkins, Linux, AWS basics.

Quality Engineering

- JUnit, Mockito, integration testing, API testing, code review.

Languages

French native; English professional; basic Vietnamese greetings.
