Career Goals

Senior Java Fullstack Developer with 6 years of experience delivering enterprise web and mobile systems. Strong in Java, Spring Boot, RESTful APIs, TypeScript, WebSquare, SQL, CI/CD, Docker, Kubernetes, and cloud deployment. Seeking a Senior Fullstack role where I can lead technical delivery, improve system stability, and mentor engineers.

Education

2014-2018 **B.Sc. Software Engineering**
FPT University, Hanoi. Major: Software Engineering.

Certificates

2022 AWS Certified Cloud Practitioner
2021 Oracle Certified Professional Java SE 11
2020 TOEIC 850

Soft Skills

Technical leadership and mentoring
Requirement analysis and estimation
Agile/Scrum collaboration
Problem solving and ownership

Hobby

Badminton, technical blogging, open-source contributions, mentoring junior developers, and exploring cloud-native architecture.

Experience Summary

Senior Java Fullstack Developer with 6 years of experience in enterprise application development. Completed 30+ projects; selected below are the 7 largest and favorite projects that best represent his technical depth, ownership, and delivery impact.

Selected Projects

1. Enterprise Banking Web Portal

Company project | Senior Fullstack Developer / Module Lead

A secure web portal for account management, customer onboarding, transaction review, and internal approval workflows.

- Designed Spring Boot REST APIs and service-layer architecture for customer, account, and approval modules.
- Built WebSquare and TypeScript screens, optimized form validation, and integrated with core banking and KYC systems.
- Improved API response time through SQL tuning, Redis caching, pagination, and profiling; guided 3 junior developers.

2. Smart Factory MES Dashboard

Company project | Fullstack Developer

A manufacturing execution dashboard for production tracking, machine status, defect logging, and daily operation reporting.

- Implemented Java/Spring Boot APIs, WebSocket event streaming, PostgreSQL reporting queries, and role-based access control.
- Developed TypeScript dashboard components, charts, filters, and export features for supervisors and plant managers.
- Containerized services with Docker and supported Kubernetes deployment in staging.

3. E-commerce Order and Inventory Platform

Company project | Backend-focused Fullstack Developer

A multi-vendor order, inventory, and promotion platform supporting real-time stock reservation and fulfillment tracking.

- Built order, inventory, and promotion microservices with Spring Boot, JPA/Hibernate, PostgreSQL, and RESTful APIs.
- Integrated payment, delivery, and notification providers; wrote JUnit/Mockito unit tests and integration tests.
- Supported CI/CD pipelines, defect fixing, production monitoring, and performance optimization during campaign traffic.

Nguyen Hoang Minh

Senior Java Fullstack Developer

Profile Snapshot

6 years of fullstack engineering experience. Delivered 30+ projects across banking, manufacturing, e-commerce, healthcare, HR automation, and internal productivity platforms.

Core Strengths

Java / Spring Boot backend architecture

TypeScript frontend and WebSquare UI

Database performance tuning

CI/CD, Docker, Kubernetes, AWS/GCP basics

Unit, integration, and regression testing

Selected Projects and Skills

4. Healthcare Appointment Mobile-Web System

Company project | Fullstack Developer

A hospital appointment and patient communication system used by receptionists, doctors, and patients.

- Developed Spring Boot REST APIs for appointment booking, doctor schedules, patient profiles, and notification flows.
- Created responsive admin screens with React/TypeScript and collaborated with mobile developers on API contracts.
- Improved stability by adding validation, logging, error handling, and regression test coverage for critical flows.

5. Intelligent Recruitment and CV Matching Platform

Own project | Owner / Fullstack Developer

A favorite personal product that parses CVs, stores candidate profiles, matches CVs against job descriptions, and ranks applicants.

- Designed the full architecture with Spring Boot, PostgreSQL, React/TypeScript, Docker, and a separate AI matching service.
- Built candidate, job, CV upload, scoring, dashboard, and audit-log modules with clean API contracts.
- Focused on explainable scoring, searchable candidate pipelines, and practical HR workflow automation.

6. Developer Productivity Analytics Tool

Company internal project | Technical Lead

An internal platform that consolidates Jira, Git, Confluence, and CI data to support engineering delivery visibility.

- Led module design, sprint planning, code review, and technical decisions for a team of 4 developers.
- Built integrations with Jira and Git APIs, implemented permission models, and created dashboard APIs for delivery metrics.
- Reduced manual weekly reporting effort by automating project health summaries and release-readiness checks.

7. Open-source Learning Management System

Personal / open-source project | Maintainer

A modular LMS for courses, quizzes, assignments, progress tracking, and basic teacher-student communication.

- Refactored a monolithic codebase into clearer backend modules and reusable frontend components.
- Implemented authentication, course enrollment, quiz grading, file upload, and SQL query optimization.
- Maintained documentation, GitHub issues, pull requests, and contributor onboarding notes.

Skills

Backend Development

- Java, Spring Boot, Spring Security, JPA/Hibernate, RESTful APIs, OAuth2/JWT, RabbitMQ/Kafka basics, Redis.

Frontend Development

- HTML, CSS, JavaScript, TypeScript, React, Next.js, WebSquare, responsive web/mobile UI, component-based development.

Databases

- PostgreSQL, MySQL, SQL optimization, indexing, transaction handling, schema design, query profiling.

DevOps and Collaboration

- Git, Jira, Confluence, Docker, Kubernetes, Jenkins, GitHub Actions, Linux, AWS/GCP fundamentals.

Quality Engineering

- JUnit, Mockito, integration testing, API testing, SonarQube, code review, defect analysis, performance tuning.

Languages

- English professional working proficiency; basic Korean communication.
