

Nguyễn Văn Hải

Frontend Developer

Personal Information

Phone: (+84) 903 111 246
Email: hai.nguyen.web@email.com
LinkedIn: linkedin.com/in/nguyen-van-hai
GitHub: github.com/nguyen-van-hai
Location: Thanh Xuan, Hanoi, Vietnam
Fit score: 25/100

Career Goals

Frontend developer with 5 years of web UI experience. Seeking to move gradually into enterprise fullstack development and strengthen backend skills in Java/Spring.

Education

2015-2019 B.Sc. Information Technology, Hanoi Open University.

Certificates

2023 Responsive Web Design
2022 JavaScript Algorithms
2020 TOEIC 620

Soft Skills

Careful UI implementation
Team communication
Bug fixing and support

Hobby

Football, UI cloning, reading UX blogs.

Experience Summary

Frontend developer with 5 years of experience building internal dashboards and responsive web pages. Completed 18 small and medium UI projects. The profile has some overlap with HTML/CSS/JavaScript requirements, but lacks deep Java/Spring, large system design, retail/POS, and English design documentation experience.

Selected Projects

1. HR Admin Dashboard

Company project | Frontend Developer

Internal HR tool for employee profile, leave request, and approval screens.

- Implemented HTML, CSS, and JavaScript screens from Figma mockups.
- Fixed cross-browser layout issues and supported manual regression testing.
- Integrated simple REST endpoints provided by backend developers.

2. Marketing Landing Page CMS

Company project | Web Developer

A CMS-driven landing page system for campaign pages and lead forms.

- Built responsive templates and reusable CSS components.
- Optimized image size and page load for mobile users.
- Created basic validation for lead forms.

3. Warehouse Report Viewer

Company project | Frontend Developer

A report viewer for warehouse operators to filter stock movement data.

- Created filter panels, tables, and CSV export UI.
- Worked with QA to reproduce UI defects.
- Used basic SQL queries to understand report data.

Nguyễn Văn Hải

Frontend Developer

Profile Snapshot

5 years in HTML/CSS/JavaScript and admin dashboard UI. Limited Java/Spring exposure; suitable for junior transition rather than senior System Replace role.

Core Strengths

HTML, CSS, JavaScript UI
Basic REST integration
Manual testing
Simple SQL

Selected Projects and Skills

4. Customer Support Portal

Company project | Frontend Developer

Ticket listing and customer message screen for support agents.

- Implemented status badges, search, and pagination UI.
- Improved accessibility labels and keyboard navigation.
- Documented UI behavior in Vietnamese.

5. Simple Online Store Demo

Personal project | Owner

Demo store for product listing and cart interaction.

- Used HTML, CSS, JavaScript, and local storage.
- Practiced REST API consumption with mock data.
- No production Java/Spring backend.

6. Team Wiki Theme

Company internal project | Web UI Maintainer

Theme customization for an internal documentation wiki.

- Adjusted CSS, navigation, and typography.
- Supported content editors with page templates.
- Maintained simple release notes.

Skills

Backend Development

- Basic Java syntax, simple REST API consumption, limited Spring Boot learning.

Frontend Development

- HTML, CSS, JavaScript, Bootstrap, basic TypeScript, responsive UI.

Databases

- Basic MySQL select queries and CSV export support.

DevOps and Collaboration

- Git, Jira, basic Linux commands, manual deployment support.

Quality Engineering

- Manual test cases, UI regression checking, defect reproduction.

Languages

Vietnamese native; English basic workplace reading.
