

Nguyen Gia Huy

Frontend Developer

Hanoi, Vietnam | nguyen.gia.huy.demo@example.com | +84-90-000-3003 | Portfolio: [demo/giahuy](#)

PROFESSIONAL SUMMARY

Frontend developer with 5 years of HTML, CSS, JavaScript, React, and UI implementation experience. Comfortable consuming REST endpoints and performing manual UI regression checks. Java/Spring exposure is limited to basic learning and small internal exercises, with no production Java/Spring backend ownership.

CORE SKILLS

- Frontend: HTML, CSS, JavaScript, TypeScript, React, Redux, responsive UI, form validation.
- API usage: consumed REST endpoints from frontend applications, handled request/response states and error messages.
- Testing: manual UI regression testing, browser compatibility checks, basic Postman checks for frontend integration.
- Database: basic SQL reading, simple SELECT queries, no database design ownership.
- Java/Spring: basic Java syntax and limited Spring Boot learning from training materials only.
- No production Java/Spring backend, no large backend system replacement project, and no senior backend ownership yet.

PROFESSIONAL EXPERIENCE

Frontend Developer - Customer Web Portal, BrightUI Vietnam | 2021 - 2026

- Implemented React/TypeScript screens for login, profile, search, dashboard, and request forms.
- Integrated frontend pages with existing REST APIs provided by backend teams; did not design or implement backend services.
- Performed manual UI regression testing and reported API contract issues to backend engineers.
- Created UI documentation and component notes for internal frontend team members.

Junior Frontend Developer - Internal Tools, WebCraft Studio | 2019 - 2021

- Built HTML/CSS/JavaScript interfaces and simple admin pages for internal business systems.
- Learned basic Java syntax and tried limited Spring Boot examples, but not used in production.

SELECTED PROJECTS

- CRM frontend module: React pages consuming customer and ticket APIs built by another backend team.
- Training app: small Spring Boot to-do exercise created for learning basic controller syntax only.
- UI regression checklist: manual browser checks for frontend releases.

EDUCATION

- B.Sc. Information Technology - Hanoi University of Industry, 2019

LANGUAGES AND COLLABORATION

- Vietnamese: Native; English: basic workplace reading and simple written communication.
- No Japanese business communication experience.

ADDITIONAL NOTES

- Suitable for frontend or junior transition roles; not yet suitable for senior Java/Spring backend system replacement responsibility.
