

Akiyama Hiroto

Senior Java / Spring Boot Full-Stack Engineer

Tokyo, Japan | akiyama.hiroto.demo@example.com | +81-90-0000-1001 | LinkedIn: demo/akiyama-hiroto

PROFESSIONAL SUMMARY

Senior full-stack engineer with 11 years of production experience in Java, Spring Boot, retail systems, POS integration, inventory management, reuse business platforms, and enterprise system replacement projects. Experienced in technical leadership, API design, English/Japanese documentation, testing strategy, and cross-border collaboration with Japan-side stakeholders.

CORE SKILLS

- Java 8/11/17, Spring Boot, Spring MVC, Spring Security, JPA/Hibernate, REST API design, batch processing.
- Frontend: HTML, CSS, JavaScript, TypeScript, React, Vue.js for admin dashboards and business screens.
- Domain: retail, POS transaction, inventory, product master, order management, reuse / second-hand business.
- Testing: JUnit, Mockito, API testing, integration testing, system test scenarios, SonarQube code review.
- DevOps: AWS, Docker, Kubernetes, Redis, Kafka, CI/CD pipelines, GitLab CI, Linux.
- Documentation: basic design documents, detailed design documents, API specifications, English design documents.

PROFESSIONAL EXPERIENCE

Lead Java Engineer - Retail System Replacement, Sakura Digital Solutions | 2020 - 2026

- Led Spring Boot service design for core inventory, POS transaction synchronization, product master, and store operation modules in a large system replacement project.
- Designed and implemented REST APIs used by web admin, store tablet UI, and external POS systems; handled high-volume transaction data with Redis and Kafka.
- Created basic design documents, detailed design documents, API specifications, and system test scenarios in English for Japan-side review.
- Mentored six backend/frontend engineers, reviewed Java/Spring code, and coordinated with Japanese product owners and QA teams.

Senior Full-Stack Developer - Reuse Business Platform, BlueLoop Retail Tech | 2016 - 2020

- Built Spring Boot microservices for purchase assessment, stock movement, warehouse inventory, and online sales integration.
- Implemented TypeScript frontend screens for inventory search, stock adjustment, and order status dashboards.
- Improved batch processing performance for large inventory datasets and introduced automated JUnit/Mockito regression tests.

Java Developer - Enterprise Web Systems, NextBridge Software | 2013 - 2016

- Developed Java/Spring web applications, maintained SQL schemas, and supported integration testing for enterprise customers.

SELECTED PROJECTS

- Retail POS modernization: Spring Boot API gateway, POS transaction import, inventory reconciliation, and store master management.
- Inventory dashboard: React + TypeScript UI connected to Java backend APIs with role-based access control.
- Testing modernization: introduced API test suites, integration tests, and code review workflow using SonarQube.

EDUCATION

- B.Sc. Computer Science - Osaka Institute of Technology, 2013

LANGUAGES AND COLLABORATION

- Japanese: Native; English: Advanced business documentation and meetings; JLPT not applicable; TOEIC 910 equivalent.
- Worked daily with Japan-side stakeholders, offshore engineers, QA members, and business analysts.
