

Tran Bao Duc

PHP / Node.js Web Developer

Da Nang, Vietnam | tran.bao.duc.demo@example.com | +84-90-000-4004 | GitHub: demo/baoduc

PROFESSIONAL SUMMARY

Web developer with 4 years of experience mostly in PHP Laravel, Node.js, and small business websites. Stronger in PHP/Node.js than Java/Spring. Java and Spring Boot have only been studied through basic tutorials and an internal learning project, with no production Java/Spring backend experience.

CORE SKILLS

- Primary stack: PHP, Laravel, Node.js, Express, MySQL, basic Vue.js.
- Basic web development: CRUD pages, small admin panels, authentication, file upload, simple reports.
- Java/Spring: basic Spring Boot tutorial app only; not yet used in production and not used in a large production Java system.
- Testing: mostly manual testing; no JUnit, Mockito, API testing strategy, or system test scenario ownership.
- Documentation: simple README files and internal notes; no English design document or API specification ownership.
- No retail POS, inventory system, reuse business, enterprise system replacement, or Japan-side collaboration experience.

PROFESSIONAL EXPERIENCE

PHP / Node.js Developer - Small Business Websites, OceanWeb | 2022 - 2026

- Developed Laravel CRUD modules for booking, blog management, contact forms, and small admin panels.
- Created Node.js endpoints for simple internal tools, but projects were small and not enterprise-scale.
- Performed manual testing before release; no automated Java/Spring testing framework used.

Junior Web Developer - Freelance Projects | 2020 - 2022

- Built landing pages, WordPress customizations, and basic database-backed websites for local clients.
- Completed a basic Spring Boot training app but has not used Java/Spring in production.

SELECTED PROJECTS

- Laravel booking system: small CRUD app for local service provider.
- Node.js internal checklist: simple REST endpoints for task tracking.
- Spring Boot training app: personal demo for learning controller, service, and repository syntax only.

EDUCATION

- Diploma in Web Programming - Aptech Vietnam, 2020

LANGUAGES AND COLLABORATION

- Vietnamese: Native; English: basic reading.
- No Japanese language, no offshore Japan collaboration.

ADDITIONAL NOTES

- Candidate is stronger for PHP/Node.js junior-mid web development than Senior Java/Spring enterprise replacement roles.
