

JOB DESCRIPTION

Data Engineer

FULL-TIME / HYBRID

TechNova Analytics - Sample Recruitment JD

Position	Data Engineer	Department	Data & Analytics
Level	Middle / Senior	Location	Hanoi, Vietnam - Hybrid
Employment	Full-time	Salary Range	Negotiable by experience
Reports To	Data Engineering Lead	Application	hr@technova.example

1. Company Overview

TechNova Analytics is a technology company building data-driven products for recruitment, finance, and enterprise operations. We help organizations collect, transform, govern, and analyze data at scale so that business teams can make faster and more reliable decisions.

2. Role Summary

We are looking for a Data Engineer to design, build, and maintain reliable data pipelines and analytics infrastructure. The successful candidate will work closely with data scientists, backend engineers, product owners, and business stakeholders to ensure that high-quality data is available for reporting, machine learning, and operational decision-making.

3. Key Responsibilities

- Design, develop, and maintain scalable ETL/ELT pipelines for structured and semi-structured data sources.
- Build and optimize data models, data warehouses, data marts, and analytical datasets for BI and ML use cases.
- Implement data ingestion workflows from APIs, databases, files, event streams, and third-party platforms.
- Ensure data quality through validation checks, monitoring, alerting, lineage tracking, and documentation.
- Collaborate with data scientists to prepare clean feature datasets and production-ready data workflows.
- Optimize SQL queries, pipeline performance, job scheduling, and storage costs across data platforms.
- Maintain data security, access control, privacy compliance, and governance standards.
- Participate in code reviews, technical design discussions, and continuous improvement of data engineering practices.

4. Required Qualifications

- Bachelor degree in Computer Science, Information Systems, Data Science, Software Engineering, or a related field.
- Strong SQL skills and practical experience with relational databases such as PostgreSQL, MySQL, or SQL Server.
- Solid programming experience in Python, including data processing libraries and clean coding practices.
- Hands-on experience with ETL/ELT pipelines, data modeling, and workflow orchestration tools such as Airflow, Prefect, or similar.
- Understanding of data warehouse concepts, dimensional modeling, partitioning, indexing, and query optimization.

JOB DESCRIPTION

Data Engineer

FULL-TIME / HYBRID

TechNova Analytics - Sample Recruitment JD

- Experience using Git, Docker, Linux command line, and basic CI/CD workflows.
- Good problem-solving ability, attention to data accuracy, and ability to communicate technical topics clearly.

5. Preferred Qualifications

- Experience with distributed processing frameworks such as Apache Spark, Databricks, or Flink.
- Experience with cloud data services such as AWS Glue, Redshift, S3, Lambda, GCP BigQuery, Dataflow, or Azure Data Factory.
- Familiarity with message queues or streaming platforms such as Kafka, RabbitMQ, or Pub/Sub.
- Knowledge of dbt, Snowflake, lakehouse architecture, data lake design, or modern analytics engineering practices.
- Basic understanding of machine learning data pipelines, feature stores, or model monitoring workflows.

6. Technical Stack

Python	SQL	PostgreSQL	Airflow
Spark	Kafka	Docker	Git
dbt	AWS/GCP/Azure	BigQuery/Snowflake	Power BI

7. Benefits

- Competitive salary with performance-based review.
- 13th-month salary, annual leave, health insurance, and company benefits according to policy.
- Hybrid working model with flexible working arrangements depending on project needs.
- Training budget, technical mentoring, and opportunities to work on production-scale data systems.
- Clear career path toward Senior Data Engineer, Data Platform Engineer, or Analytics Engineering Lead.

8. Recruitment Process

- CV screening and initial HR discussion.
- Technical interview covering SQL, Python, data modeling, and pipeline design.
- Practical case study or take-home assignment, depending on candidate profile.
- Final interview with Engineering Manager and offer discussion.

9. How to Apply

Please send your CV and a short summary of relevant data engineering projects to hr@technova.example with the email subject: **Application - Data Engineer - Your Name**.
